Economical

TRIGA® Go TENSIONED TEXTILE DISPLAY, is the preferred solution for creating large TEXTILE GRAPHIC displays, that are cost effective, easy to set up and transport. Display as single or double-sided structures.

Save on expenses and mix-and-match the standard TRIGA® Go system components in different configurations creating ever changing displays. Add on components and grow your display as your marketing requirements evolve.

TRIGA® Go is PERFECT for:

- Small to medium sized exhibition stands, brand walls, presentation backdrops, pop-up and retail stores, office partitions, conferences and other activations.
- Walls, towers, booths and totems up to 2.5m in height.
- For structures where 90-degree angles are required.
- Low or no weight bearing structures.
- Professionals with a busy travel schedule.

TRIGA® Go EXPLAINED:

A typical TRIGA® Go display will consist of only 4 main parts which comprises of a number of feet, uprights, crossbars and corner braces. This makes up the aluminium structure onto which the textile digital print is fitted.

Join poles to foot plate and turn the pole to secure.

Join the top and bottom poles and turn the connector collar to lock.

Insert bottom crossbar connector into pole collar and swivel green locking button to secure the crossbar.

Slot crossbar into tensioner. Once the textile print is fitted, press down firmly on the top of the tensioner to extend it, resulting in wrinkle-free graphics.

The printed textile graphic is fitted with a plastic beading that simply slides into the groove on the crossbar.

1. Poles
2. Crossbars
3. Corner Braces
4. Foot Plates

TRIGA® Go is exceptionally light and compact, making it the perfect travel companion.
