

TRIGA® DISPLAYS offers premium branding, display, exhibition and shop-fitting solutions backed by world-class design, technical innovation and expertise.

Proudly engineered in South Africa, TRIGA® tensioned textile display solutions are tool-less, quick to assemble, light weight, space saving, modular and eco-friendly. TRIGA® offer endless reconfigurable design possibilities with a trendy, crease-free finish. Available in two product ranges, namely TRIGA® Go and Max, each with its own unique features, applications and accessories, the systems can also be used in tandem, ensuring you get the best of both worlds.

### BRIEF PRODUCT COMPARISON

- Where extensive customization and maximum versatility is required.
- Larger activations and display applications with high structures (walls or towers) that exceed 2.5m in height.
- Curved walls and towers (Convex or Concave)
- Any non-90 degree designs. TRIGA® Max can be configured at 45-degree angles.
- Weight bearing structures. For example shelving, LCD screens, steel cabling with brochure racks or product displays, magnetic attachments etc.
- Suitable for direct wall mounting in office or retail environments.
- Shell mount applications to clad traditional shell scheme stands in seamless textile prints.
- Where rigid panelling forms part of the expo stand design.

- Small to medium sized exhibition stands, brand walls, presentation backdrops, pop-up and retail stores, office partitions, conferences, roadshows, photobooths and a multitude of activations.
- Counters, walls, towers, booths and totems up to 2.5m (8') in height. (Single or Double Sided)
- For structures where only 90-degree angles are required.
- Low or no weight bearing structures.
- Marketing professionals and brand managers with multi venue campaigns requiring lightweight highly portable solutions.
